Data Extraction

Posted 1 day ago

📢 Specialized profiles can help you better highlight your expertise when submitting proposals to jobs like these. **Create a specialized profile.**

2 required Connects (52 available) ❓

I have a website (https://www.capterra.com/) from which I want to extract the following data
- Alternatives (each alternative name and link to each alternative profile)
- Similar Products (each Similar Products name and link to each Similar Products profile)
- Overall Ratings
- Per review (which industry the person works in, how long they used the software for, Individual ratings, date review was posted, pros and cons)

This should be a python script that takes in the company/software name as the parameter and outputs the information above into a CSV

$15	**Intermediate**
Fixed-price	Experience Level
