Quick Job for Web Scraping Data Entry

Data Extraction

Posted 2 hours ago

📢   Specialized profiles can help you better highlight your expertise when submitting proposals to jobs like these. **Create a specialized profile.**

2 required Connects (52 available) ❓

Need someone to scrape this website and generate a table including just

1. Company Name
2. Email

From this website - **https://myhomepage.ca/builder/**

Approximately 1,000 entries.

Ideally someone who is experienced with web scraping can pull this info relatively quickly.

Looking for someone who can complete this in 24hrs.

Output should be in any format that will let me open it in Google Sheets.
