2 required Connects (52 available) ❓

I need the game log tables for 100 English Premier League players copied into a spreadsheet,

Ex -- **https://fbref.com/en/players/4c370d81/matchlogs/2019-2020/summary/Roberto-Firmino-Match-Logs**

It should include games for each player for the past 3 seasons (2017-2018, 2018-2019, 2019-2020).

I'm willing to pay more if you can also scrape from another player stat page and match it to the player logs above.

For example, attach these tables to the tables in the link above -- https://fbref.com/en/players/4c370d81/matchlogs/2019-2020/possession/Roberto-Firmino-Match-Logs)
